

VEGAN PROTEIN ELITE

DISCUSSION

VEGAN PROTEIN ELITE is a revolutionary plant protein blend featuring 5 well-tolerated, vegan protein sources – yellow pea, rice, hemp, chia and cranberry – to provide a well-balanced amino acid profile in a high protein formula. In addition to the well-rounded protein profile, Vegan Protein Elite features many unique ingredients to support the immune system, the digestive system, body composition, bone health and detoxification.* Pea and rice protein provide a branch chain amino acid profile that is comparable to whey protein, providing high amounts of cysteine, lysine and methionine. This formula contains three additional protein sources, each with unique properties: organic hemp protein, featuring edestin that can stimulate antibody production; chia protein, which is desired by athletes for its endurance boosting properties and promotes hydration and a sense of fullness; and cranberry fruit protein, which has urinary tract and antioxidant benefits.* L-glutamine and l-taurine are added to Vegan Protein Elite to support an increase in lean muscle mass.* Vegan Protein Elite contains Aminogen®, a patented plant-derived enzyme blend, which helps the body break down and absorb more amino acids from protein.* It is clinically proven to release 100% more plasma amino acids, 250% more branched-chain amino acids and boost nitrogen retention by 32%.*

SUPPLEMENT FACTS (CHOCOLATE)

2 Scoops (44.6 g) Contain:
